

Sussex Borough Water Customers  
Discolored Water

Sussex Borough Water Department is aware of several reports of discolored water as a result of increased demand and higher flows. Borough staff are completing additional flushing of the water mains to clear the discolored water. Additional flushing is anticipated to be completed by Friday afternoon. While discolored, the water remains safe to drink.

When flushing is completed, we recommend the following;

- Run your water faucets for 3-5 minutes to flush your service connection and interior plumbing with water from the service main.
- Empty and clear your automatic ice makers and water chillers
- Service connections with a water softener/cartridge filters should be run through a regeneration cycle or other procedures recommended by the manufacturer

We apologize for any inconvenience and thank you for your patience.
